

SEE THE QUOTE BOOK THROUGH TO OUTCOME.

Every quote in the selected source set, followed through to a confirmed order or an outcome that still needs an owner. Figures come from the weekly quote books joined to the order logs on quote number.

QUOTE CONVERSION 13.2% 23 confirmed order links	QUOTED WORK \$150.1M 174 quote opportunities	CONFIRMED VALUE \$18.0M 12.0% value capture
95% CONFIDENCE 9.0–19.1% Wilson interval on 174 records		

ONE QUOTE BOOK. TWO VISIBLE OUTCOMES.

● 23 confirmed orders · 13.2% ● 151 unconverted · 86.8%

CONFIRMED ORDERS

23

\$18.0M returned value

24 booked jobs are linked to these quote opportunities.

UNCONVERTED OPPORTUNITIES

151

\$132.1M quoted value

Open, lost, or awaiting an owner-confirmed status. Not counted as losses.

VALUE CONCENTRATION

12.0%

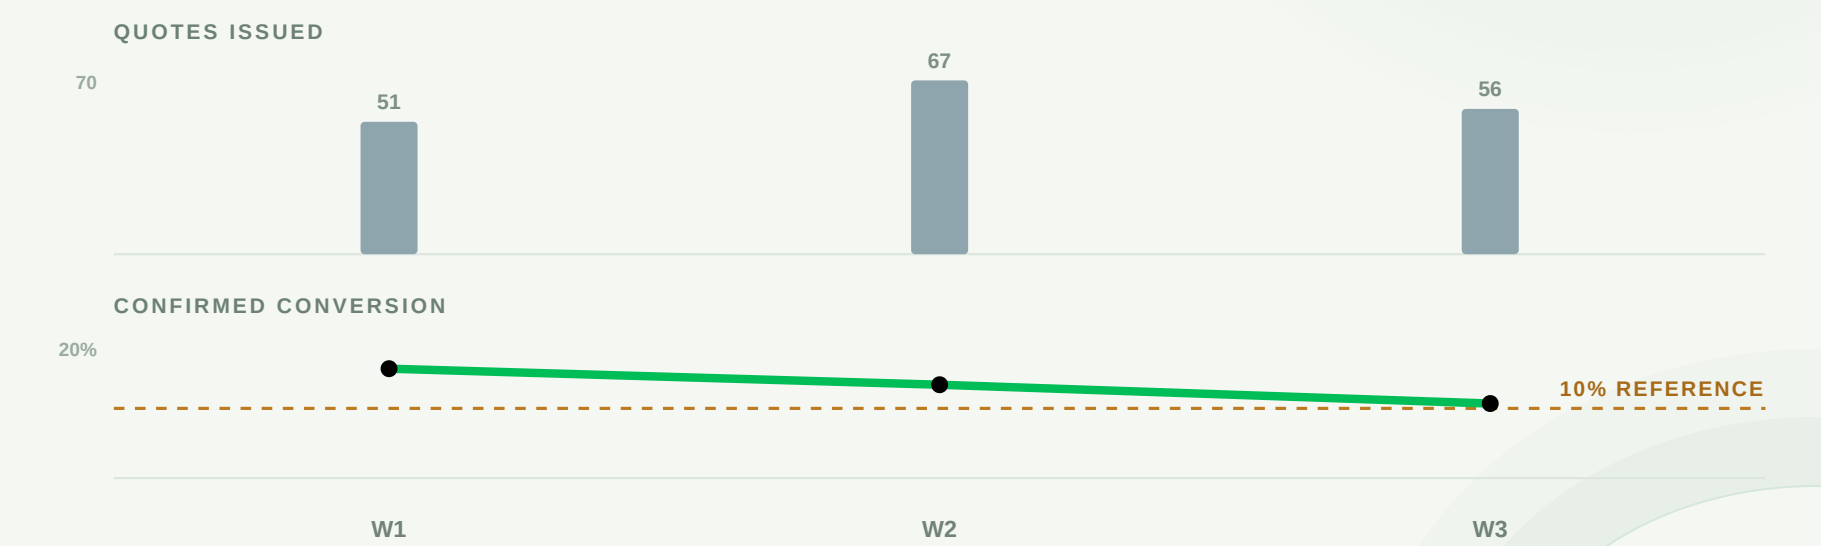

of quoted value returned

Conversion counts records; value capture weights them by price.

Management read: 151 quote records remain visible as follow-up work — not assumed losses — until a confirmed order or a named outcome is recorded against them.

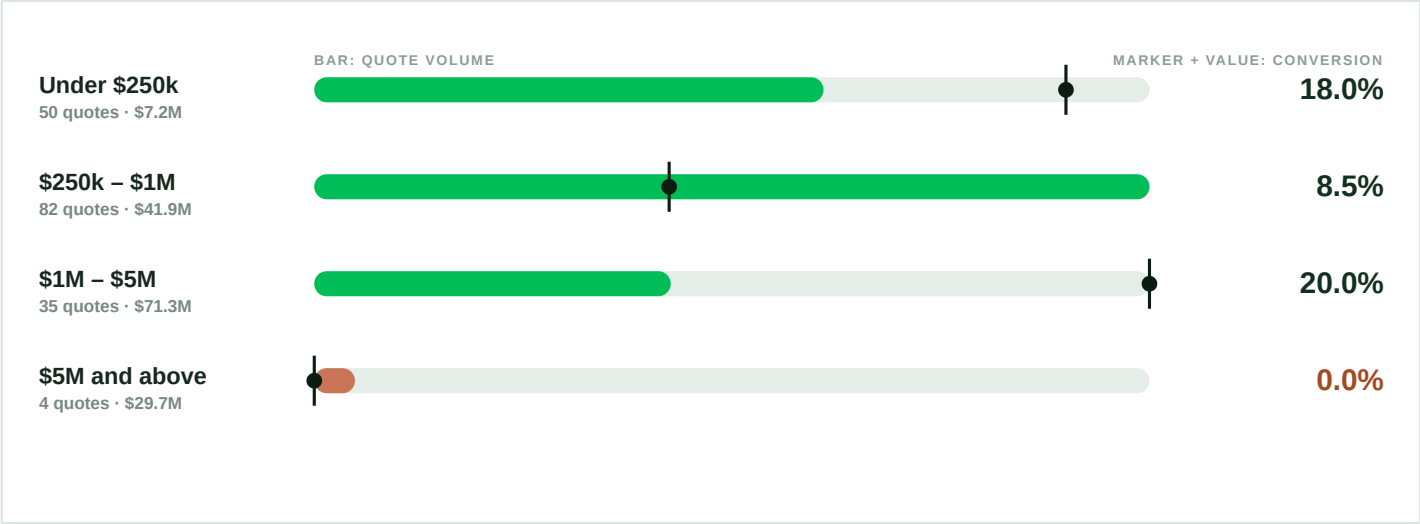

VOLUME ABOVE. CONVERSION BELOW.

QUOTED WEEKS LOADED 3 the chart scales to the set	PEAK RELEASE W2 / 67 quotes issued	STRONGEST CONVERSION W1 / 15.7% confirmed order rate	RELEASE ON TIME 86.2% 174 of 174 scored · 100% coverage
--	---	---	--

Volume and conversion stay on separate lanes so workload is never mistaken for performance. Recent weeks sit below the 10% reference because their decision window is still open — that is what the exposure lens is for.

NOT ALL QUOTED WORK BEHAVES THE SAME.

READ THE SPLIT

The largest band — 4 quotes carrying \$29.7M — has returned no linked order in this cohort. That single row is worth more than every confirmed win combined.

PRICED RECORDS SCORED

171 / 174

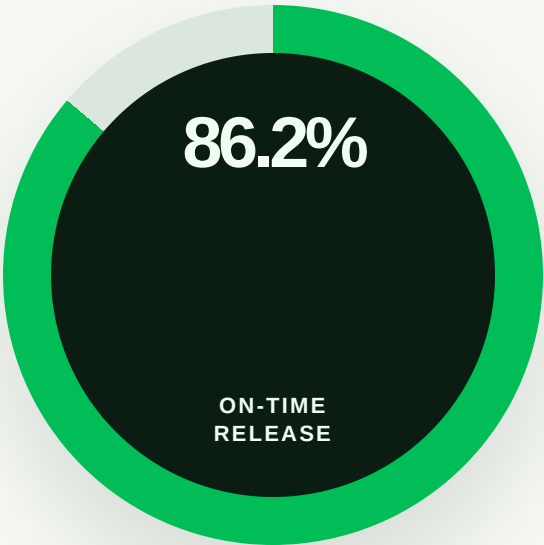

REVISED QUOTES CONVERT AT

40.0%

10 revised vs 11.6% on 164 single-pass

Where to look first: conversion is a rate, but the follow-up list should be ordered by value. The bands above show which size of work is actually returning, and which is quoted heavily but rarely booked.

WORK DELIVERED WHEN IT WAS NEEDED.

RELEASE DISCIPLINE

SPEED, MEASURED ONLY WHERE IT WAS SCORED.

On-time release compares each requested due date with its sent quote date. It is independent of conversion — a late quote can still win, and an early one can still go unanswered.

174 of 174 scored · 100% coverage

Delivered on the due date counts as on time; the workbook writes that result as N/A. Only rows with no release result at all are excluded from both halves of the rate.

SEE THE OPERATING DEPTH BEHIND OUTCOME.

CUSTOMER ACCOUNTS 113 19 repeat · 94 first seen	BOOKED VOLUME 3,605.2 24 jobs with Total Tons	MOST QUOTE WINS 2 DESIGN BUILDERS	REPEAT, NO LINKED WIN 14 \$32.7M quoted
--	--	--	--

WEIGAND		2 wks · \$8.7M
FERGUSON		3 wks · \$5.9M
BRECKNOCK BUILDERS, LLC		2 wks · \$3.3M
COASTAL STEEL STRUCTURES		3 wks · \$3.3M
JJ JIMMO DEVELOPMENT		2 wks · \$3.0M

DISTRICT MIX	
Quote-number prefixes, read straight off the quote key. No roster inference is applied, so no district result can misattribute a person.	
W2J	0.0%
4 quotes · \$13.3M quoted	
W1H	20.0%
10 quotes · \$12.5M quoted	
W0K	25.0%
4 quotes · \$11.6M quoted	
U1K	0.0%
8 quotes · \$11.1M quoted	
W2V	0.0%
3 quotes · \$10.2M quoted	

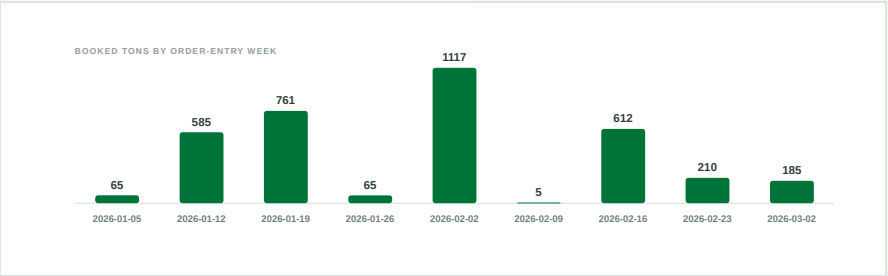

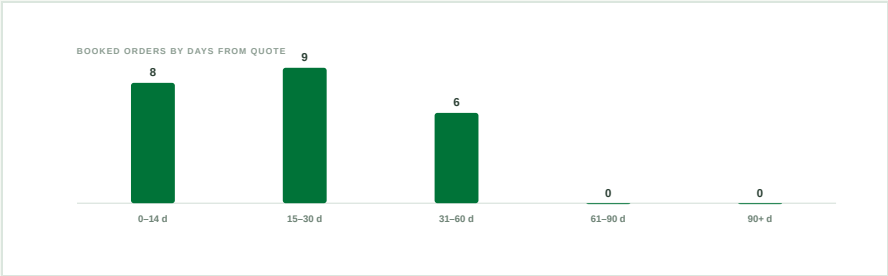

Operating read: 14 recurring accounts carry \$32.7M of quoted value with no linked win. Treat that as a follow-up queue, not a loss list — a repeat customer quoting again is a relationship still in play.

QUOTE OUTCOME DASHBOARD

Use ← → to move · P to print / save PDF

HOW LONG A DECISION ACTUALLY TAKES.

MEDIAN LAG 20 d quote sent to order entry	FAST DECISIONS (P10) 7 d quickest tenth of wins	SLOW DECISIONS (P90) 42 d slowest tenth of wins	SCORED PAIRS 23 of 23 confirmed orders
--	--	--	---

Why the exposure lens exists: half of the wins in this cohort landed within 20 days, and the slowest tenth took 42 days. A quote issued last week has not lost — it has not been decided.

WHAT THE WORK COST TO PRODUCE.

SCHEDULED HOURS	ACTUAL HOURS	OVER PLAN BY	AVERAGE TURNAROUND
229	256	27 hrs	5.1 d
set aside for this work	1.47 per quote	-11.6% against plan	36.8% inside three days

Scheduled engineering time against the hours actually spent. Green came in under the time set aside; copper ran over.

WRL		-18.7 hrs · 55 sched / 74 act
DNM		+9.4 hrs · 78 sched / 69 act
ANM		-6.3 hrs · 48 sched / 54 act
JWR		-18.5 hrs · 18 sched / 36 act
EJS		-1.5 hrs · 9 sched / 11 act
NPM		+2.8 hrs · 12 sched / 9 act
JMR		0.0 hrs · 3 sched / 3 act
JW		0.0 hrs · 1 sched / 1 act

TURNAROUND		
≤1 day		19
2–3 days		41
4–5 days		33
6+ days		70

QUOTES AT 5+
ENGINEERING HOURS

8

of 174 in this cohort

Why this sits beside conversion: conversion says whether quoted work came back. This says what it cost to produce. Engineering ran 27 hours over the time set aside, 11.6% above plan. A single engineer well over the line is a scheduling question, not a performance one — the hours were booked against an estimate made before the work started.

THE NEXT REVIEW, ALREADY PRIORITISED.

HIGHEST-VALUE WORK WITH NO LINKED ORDER

\$38.8M across the top 6

	QUOTE	CUSTOMER	QUOTE OWNER	WEEK	OPEN	VALUE
1	W0K-26001	CARVER CONSTRUCTION	Jeff Reese	W1	63 d	\$10.4M
2	W2V-26001	GREYSTONE	Danielle Miles-Schwaberow	W3	52 d	\$7.5M
3	U1K-26018	POWERHOUSE MANAGEMEN...	Wayne Lehrman	W3	49 d	\$6.8M
4	W1E-26002	MEYER	Wayne Lehrman	W1	65 d	\$5.0M
5	W2J-26001	WOODRUFF CONTRACTING	Wayne Lehrman	W3	49 d	\$4.6M
6	W2J-25082	WEIGAND	NPM	W2	56 d	\$4.4M

Ordered by quoted value, not by age. Each row needs one of three answers at the review: still live, lost with a reason, or an owner-held next step and a date.

THREE THINGS THIS DATA SAYS

01 The largest band — 4 quotes carrying \$29.7M — has returned no linked order in this cohort. That single row is worth more than every confirmed win combined.

02 150k and above converts at 0.0% across 5 quotes — the weakest scored size band.

03 Release timing is scored on 174 of 174 scored · 100% coverage. Widening that coverage would make delivery discipline a usable operating measure rather than a partial one.
