

SEE THE QUOTE BOOK THROUGH TO OUTCOME.

Every quote in the selected source set, followed through to a confirmed order or an outcome that still needs an owner. Figures come from the weekly quote books joined to the order logs on quote number.

QUOTE CONVERSION 13.2% 23 confirmed order links	QUOTED WORK \$150.1M 174 quote opportunities	CONFIRMED VALUE \$18.0M 12.0% value capture
95% CONFIDENCE 9.0–19.1% Wilson interval on 174 records		

ONE QUOTE BOOK. TWO VISIBLE OUTCOMES.

● 23 confirmed orders · 13.2% ● 151 unconverted · 86.8%

CONFIRMED ORDERS

23

\$18.0M returned value

24 booked jobs are linked to these quote opportunities.

UNCONVERTED OPPORTUNITIES

151

\$132.1M quoted value

Open, lost, or awaiting an owner-confirmed status. Not counted as losses.

VALUE CONCENTRATION

12.0%

of quoted value returned

Conversion counts records; value capture weights them by price.

Management read: 151 quote records remain visible as follow-up work — not assumed losses — until a confirmed order or a named outcome is recorded against them.

VOLUME ABOVE. CONVERSION BELOW.

QUOTED WEEKS LOADED 3 the chart scales to the set	PEAK RELEASE W2 / 67 quotes issued	STRONGEST CONVERSION W1 / 15.7% confirmed order rate	RELEASE ON TIME 86.2% 174 of 174 scored · 100% coverage
--	---	---	--

Volume and conversion stay on separate lanes so workload is never mistaken for performance. Every loaded week sits at or above the 10% reference on this cohort.

NOT ALL QUOTED WORK BEHAVES THE SAME.

READ THE SPLIT

The largest band — 4 quotes carrying \$29.7M — has returned no linked order in this cohort. That single row is worth more than every confirmed win combined.

PRICED RECORDS SCORED

171 / 174

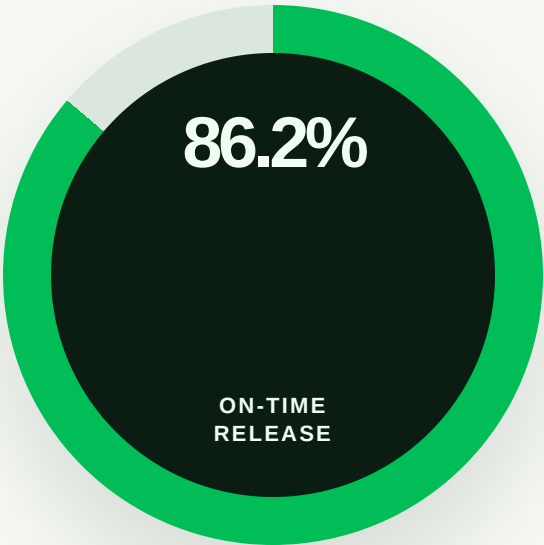

REVISED QUOTES CONVERT AT

40.0%

10 revised vs 11.6% on 164 single-pass

Where to look first: conversion is a rate, but the follow-up list should be ordered by value. The bands above show which size of work is actually returning, and which is quoted heavily but rarely booked.

WORK DELIVERED WHEN IT WAS NEEDED.

RELEASE DISCIPLINE

SPEED, MEASURED ONLY WHERE IT WAS SCORED.

On-time release compares each requested due date with its sent quote date. It is independent of conversion — a late quote can still win, and an early one can still go unanswered.

174 of 174 scored · 100% coverage

Delivered on the due date counts as on time; the workbook writes that result as N/A. Only rows with no release result at all are excluded from both halves of the rate.

WHO ASKS, AND WHO ACTUALLY BOOKS.

ACCOUNTS QUOTED 113 19 asked in more than one week	ACCOUNTS THAT BOOKED 21 18.6% of accounts returned work	ASKED, BOOKED NOTHING 24 \$59.5M quoted with no order	TOP TEN CONCENTRATION 42.7% of quoted value sits with ten accounts	BOOKED VOLUME 3,605.2 24 jobs carry Total Tons
---	--	--	---	---

The accounts that asked most often, with what actually came back nested inside what they asked for.

ASKED TWICE OR MORE, BOOKED NOTHING

Ordered by the value that returned as nothing — the size of the question, not the number of requests.

POWERHOUSE MANAGEMENT... **\$11.1M**
8 quotes · 1 week · 11.8 eng hrs

WEIGAND **\$8.7M**
2 quotes · 2 weeks · 2.5 eng hrs

FERGUSON **\$5.9M**
4 quotes · 3 weeks · 3.0 eng hrs

Kaiser-Martin Group **\$4.1M**

DISTRICT MIX

**W2J 0.0% W1H
20.0% W0K 25.0%**

Read off the quote key, so
no district result can
misattribute a person.

Operating read: 24 accounts asked at least twice and booked nothing, carrying \$59.5M of quoted value and 99 engineering hours. That is the cost of demand that did not return — a follow-up queue, not a loss list.

QUOTE OUTCOME DASHBOARD

HOW LONG IT TAKES TO COME BACK.

MEDIAN TIME TO PRICE 5.0d Date In to Done on 168 quotes	MEDIAN TIME TO ANSWER 15d Done to order entry on 23 booked quotes	HALF OF ORDERS LAND BY day 21 of 23 quotes that booked	OPEN BOOK \$132.1M 151 quotes with no linked order
--	--	---	---

LIFECYCLE			
0 days		22	43 days
Produce the quote			5.0d
Date In → Done · average 5.7d · 9 in 10 inside 11d · 168 scored			
Customer answers			15d
Done → order entry · average 19d · 9 in 10 inside 40d · 23 scored			
Whole cycle			28d
Date In → booked work · average 27d · 9 in 10 inside 43d · 23 scored			
The three stages are measured separately and do not add up: every quote has a Date In and a Done, but only a booked one has an order date.			
THE OPEN BOOK, BY HOW LONG IT HAS WAITED			
Under 15 days		0	\$0.0M
15 to 30 days		0	\$0.0M
31 to 45 days		0	\$0.0M
46 to 60 days		108	\$86.9M
Over 60 days		43	\$45.2M
The 30+ day exposure lens already excludes anything younger than 30 days, so the bands below that are empty by definition rather than because no fresh work exists.			

What to do with this: half of everything that booked had done so by day 21, so a quote past that point is past the window most of this book decides in — not lost, but worth a named next step. 43 quotes carrying \$45.2M have now waited more than sixty days. That is the follow-up list, ordered by value on the closing slide.

WHAT THE WORK COST TO PRODUCE.

SCHEDULED HOURS	ACTUAL HOURS	OVER PLAN BY	AVERAGE TURNAROUND
229	256	27 hrs	5.1 d
set aside for this work	1.47 per quote	11.6% over plan	36.8% inside three days

Scheduled engineering time against the hours actually spent. Green came in under the time set aside; copper ran over.

2–3 days		41
4–5 days		33
6+ days		70

QUOTES AT 5+
ENGINEERING HOURS

8

of 174 in this cohort

Why this sits beside conversion: conversion says whether quoted work came back. This says what it cost to produce. Engineering ran 27 hours over the time set aside, 11.6% above plan. A single engineer well over the line is a scheduling question, not a performance one — the hours were booked against an estimate made before the work started.

THE NEXT REVIEW, ALREADY PRIORITISED.

HIGHEST-VALUE WORK WITH NO LINKED ORDER

\$52.6M across the top 10

	QUOTE	CUSTOMER	QUOTE OWNER	WEEK	OPEN	VALUE
1	W0K-26001	CARVER CONSTRUCTION	Jeff Reese	W1	63 d	\$10.4M
2	W2V-26001	GREYSTONE	Danielle Miles-Schwaberow	W3	52 d	\$7.5M
3	U1K-26018	POWERHOUSE MANAGEMEN...	Wayne Lehrman	W3	49 d	\$6.8M
4	W1E-26002	MEYER	Wayne Lehrman	W1	65 d	\$5.0M
5	W2J-26001	WOODRUFF CONTRACTING	Wayne Lehrman	W3	49 d	\$4.6M
6	W2J-25082	WEIGAND	NPM	W2	56 d	\$4.4M
7	W2J-26005	WEIGAND	NPM	W3	52 d	\$4.3M
8	W0F-26002	D.H. ROBERTS CONST	NPM	W2	59 d	\$3.4M
9	W0B-25130	INTEGRATED BUILDING SYS...	NPM	W1	63 d	\$3.1M
10	W1H-26004	FERGUSON	NPM	W3	51 d	\$3.0M

Ordered by quoted value, not by age. Each row needs one of three answers at the review: still live, lost with a reason, or an owner-held next step and a date.

THREE THINGS THIS
DATA SAYS

01 The largest band — 4 quotes carrying \$29.7M — has returned no linked order in this cohort. That single row is worth more than every confirmed win combined.

02 150k and above converts at 0.0% across 5 quotes — the weakest scored size band.

03 43 quotes carrying \$45.2M have waited more than sixty days with no linked order, against a book where half of everything that booked had done so by day 21. Those are the rows most in need

of a named
current status.
