

SEE THE QUOTE BOOK THROUGH TO OUTCOME.

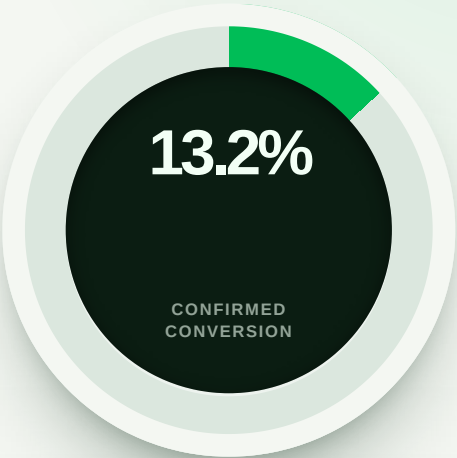

BUILDING SYSTEMS
ESTIMATING

Every quote in the selected source set, followed through to a confirmed order or an outcome that still needs an owner. Figures come from the weekly quote books joined to the order logs on quote number.

QUOTE CONVERSION	QUOTED WORK	CONFIRMED VALUE
13.2%	\$150.1M	\$18.0M
23 of 174 quotes came back	174 quote opportunities	12.0% of quoted value returned

● Imported source set · W1–W3 · 30+ day exposure · exported Aug 20, 2026

ONE QUOTE BOOK. TWO VISIBLE OUTCOMES.

● 23 confirmed orders · 13.2% ● 151 unconverted · 86.8%

CONFIRMED ORDERS

23

\$18.0M returned value

24 booked jobs are linked to these quote opportunities.

UNCONVERTED OPPORTUNITIES

151

\$132.1M quoted value

Open, lost, or awaiting an owner-confirmed status. Not counted as losses.

VALUE CONCENTRATION

12.0%

of quoted value returned

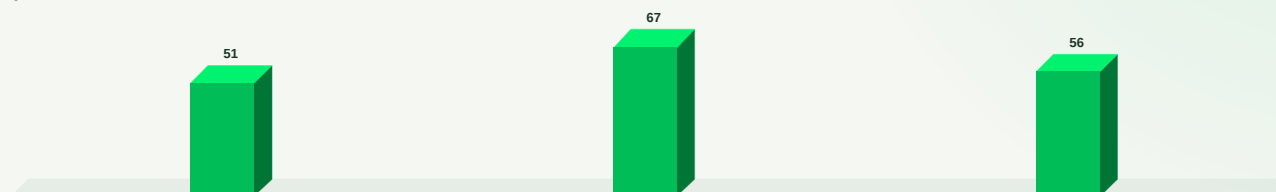

Conversion counts records; value capture weights them by price.

Management read: 151 quote records remain visible as follow-up work — not assumed losses — until a confirmed order or a named outcome is recorded against them.

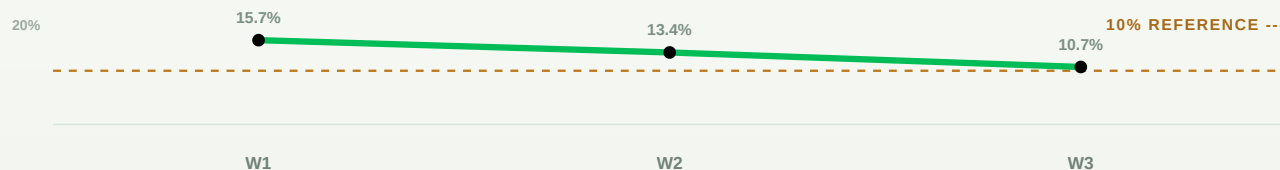

VOLUME ABOVE. CONVERSION BELOW.

QUOTED WEEKS LOADED 3 the chart scales to the set	PEAK RELEASE W2 / 67 quotes issued	STRONGEST CONVERSION W1 / 15.7% confirmed order rate	RELEASE ON TIME 86.2% 174 of 174 scored · 100% coverage
---	--	--	---

QUOTES ISSUED

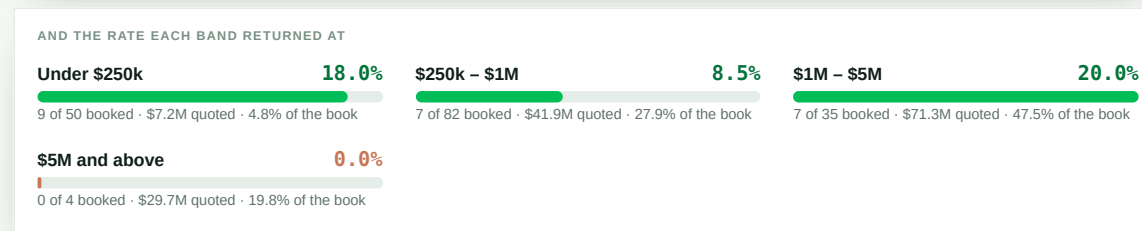

CONFIRMED CONVERSION

Volume and conversion stay on separate lanes so workload is never mistaken for performance. Every loaded week sits at or above the 10% reference on this cohort.

NOT ALL QUOTED WORK BEHAVES THE SAME.

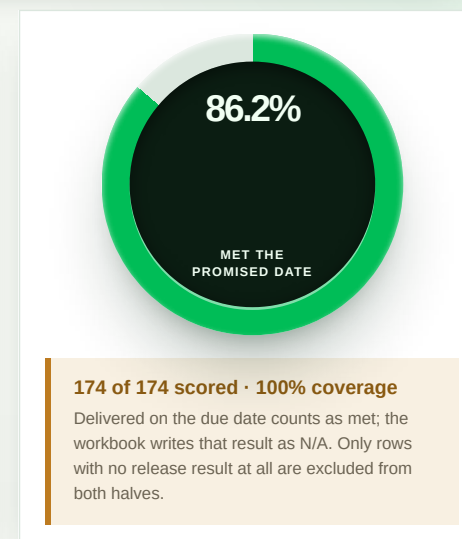

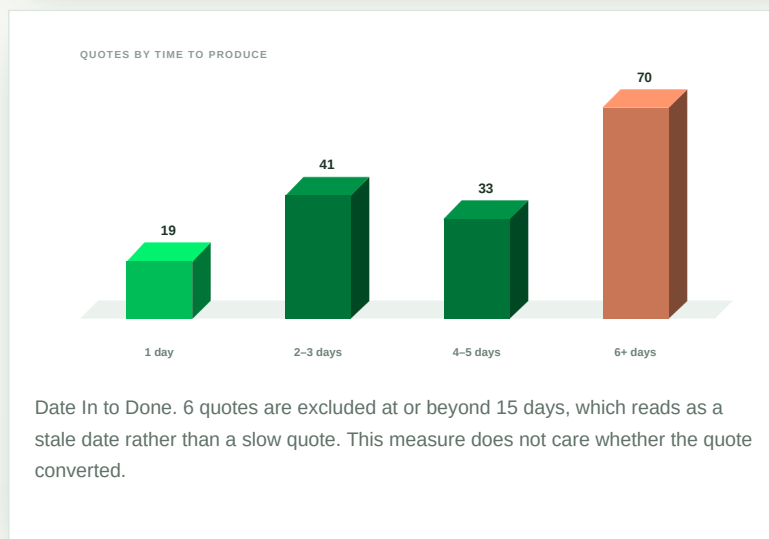

PRICED RECORDS 171 / 174 carry a value to band	BIGGEST BAND BY VALUE \$71.3M \$1M – \$5M	BEST RETURNING BAND 20.0% \$1M – \$5M · 35 quotes	RETURNED NOTHING \$29.7M 1 band with no linked order
---	--	--	---

Read it this way: Nothing in \$5M and above came back — 4 quotes carrying \$29.7M. Conversion is a rate, so a band with three quotes moves by thirty points on one order — the money beside it is what says whether that matters.

HOW FAST WE ANSWER, AND WHETHER WE HIT THE DATE.

MEDIAN TIME TO PRICE 5.0d Date In to Done on 168 quotes	INSIDE THREE DAYS 36.8% 60 of 163 scored quotes	MET THE PROMISED DATE 86.2% 174 of 174 scored · 100% coverage	SLOWEST TENTH 11d 9 in 10 quotes are out inside this
---	---	---	--

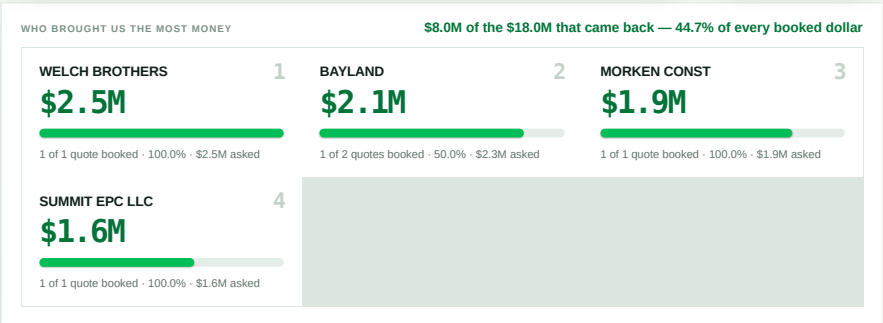

Two different promises: the columns are how long the work took, the dial is whether it landed by the date the customer was given. A quote can be quick and late, or slow and on time — a long due date is not the same as a fast quote.

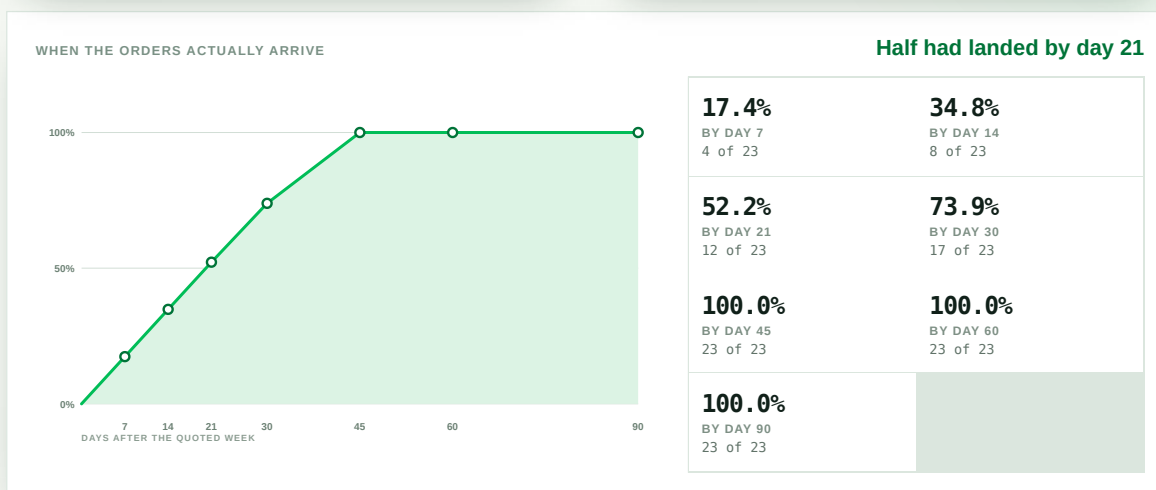

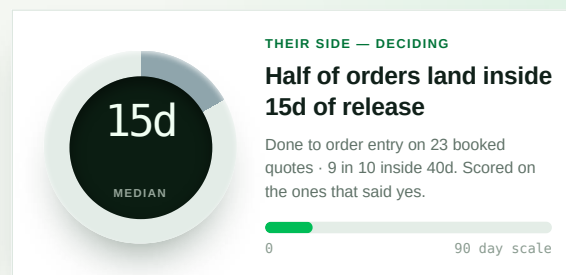

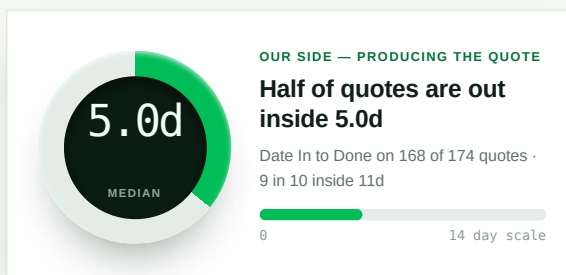

WHO ASKS, AND WHO ACTUALLY BOOKS.

ACCOUNTS QUOTED 113 19 asked in more than one week	ACCOUNTS THAT BOOKED 21 18.6% of accounts returned work	ASKED, BOOKED NOTHING 24 \$59.5M quoted with no order	TOP TEN CONCENTRATION 42.7% of quoted value sits with ten accounts	BOOKED VOLUME 3,605.2 24 jobs carry Total Tons
---	--	--	---	---

Operating read: 24 accounts asked at least twice and booked nothing, carrying \$59.5M of quoted value and 99 engineering hours — a follow-up queue, not a loss list.

HOW LONG IT TAKES TO COME BACK.

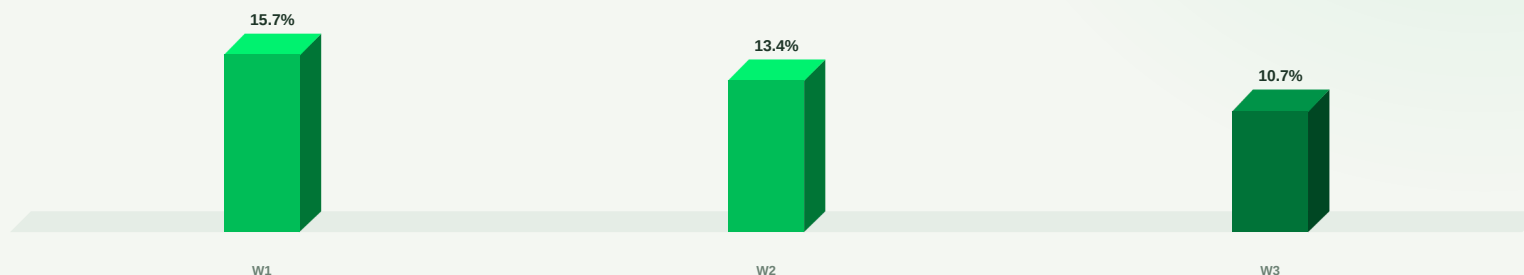

What to do with this: half of everything that booked had done so by day 21, so a quote past that point is past the window most of this book decides in — not lost, but worth a named next step. 43 quotes carrying \$45.2M have now waited more than sixty days.

EVERY WEEK MEASURED AT THE SAME AGE.

READ AT day 45 the deepest checkpoint every loaded week can answer	BOOKED BY THEN 13.2% 23 of 174 quotes across 3 weeks	STRONGEST WEEK W1 15.7% booked by day 45	WEEKS STILL TOO YOUNG 0 every loaded week can answer
--	--	--	--

SHARE OF EACH WEEK'S QUOTES BOOKED BY DAY 45

Why not just compare the weeks? A week quoted six days ago has not had a chance to answer; a week quoted sixty days ago has. Every column here is measured at the same age, so the comparison is real. W1 was at 15.7% by day 45 where W3 was at 10.7%.

OUR BEST BOOKED WORK, AND WHO DELIVERED IT.

Every row is a real order-log job matched to the quote that priced it. Value is the quoted value of that quote; tonnage and the entry date come from the order log. The first three names priced it, the names beneath sold and ran it.

01 Nothing in \$5M and above came back — 4 quotes carrying \$29.7M.

02 43 quotes carrying \$45.2M have waited more than sixty days with no linked order, against a book where half of everything that booked had done so by day 21. Those are the rows most in need of a named current status.
